PROFESSIONAL SUMMARY

Dedicated Associate Software Engineer with experience in Laravel, PHP, C#, .NET, MySQL, SQLite, Vue.js, and enterprise software development. Skilled in backend architecture, database design, REST APIs, desktop application development, and software optimization.

PROFESSIONAL EXPERIENCE

Serving Cloud Inc

Associate Software Engineer | Sep 2025 – Present

Software Engineer – Intern | Apr 2025 – Sep 2025

- Design and develop scalable backend systems using Laravel MVC.
- Build and maintain RESTful APIs and MySQL databases.
- Implement RBAC and secure authentication systems.
- Developed web modules using PHP, JavaScript, Vue.js, and Bootstrap.
- Participated in testing, debugging, and deployment activities.

TECHNICAL SKILLS

- **Languages:** PHP, C#, Java, JavaScript, SQL
- **Frameworks:** Laravel, .NET 8, WPF, Vue.js, React, Spring Boot
- **Databases:** MySQL, SQLite
- **Tools:** Git, GitHub, Visual Studio, VS Code, Postman

KEY PROJECTS

POS System Desktop Application 2026

- **System Architecture:** Built an offline-first POS desktop app using WPF (.NET 8) and SQLite with batch tracking and multi-payment support.
- **Settings Module:** Created a JSON-based config system covering printer, cash drawer, shortcuts, receipt, database, and general settings across 6 tabs.
- **Hardware Integration:** Connected ESC/POS thermal printers and cash drawer control via COM port with support for Windows, XPrinter, and Virtual Disk.
- **Database Safety:** Implemented auto-backup with timer scheduling, start/close triggers, and automatic history cleanup.

- Access Control: Designed role-based user management with menu level permissions and customizable keyboard shortcuts.

Agency Stock and Retail Management System

- System Architecture: Architected a comprehensive retail management solution using Laravel and MySQL to streamline multi-area distribution and stock tracking.
- Inventory Logic: Engineered a robust stock management module featuring real-time updates, automated inventory tracking, and lowstock alerts.
- Dynamic Pricing: Developed a flexible discount management engine capable of handling tiered pricing and seasonal promotional rules. Frontend & UX: Built a responsive, user-friendly administrative dashboard using Vue.js and Bootstrap, ensuring seamless data entry and reporting.

Regent-Wear - E commerce website

- Developed a premium e-commerce platform using Laravel and Vue.js, focusing on a seamless and responsive shopping experience. Integrated a dynamic product catalog with advanced filtering and search capabilities powered by JavaScript and MySQL.
- Engineered a secure user authentication system and a streamlined checkout process to handle customer transactions.
- Built a custom Admin Dashboard to manage inventory, track real-time sales, and update product listings.

Homoeopathic Medical Online Platform

- Developed a comprehensive digital Outpatient (O.P.) management system to streamline patient registration and appointment scheduling. Implemented Role-Based Access Control (RBAC) to ensure secure data access for doctors, patients, and administrative staff.
- Designed a digital prescription module, allowing practitioners to generate and store patient records efficiently.
- Utilized Laravel and MySQL to maintain data integrity and ensure fast retrieval of sensitive medical history.

Job Finder & Interview Management System

- AI-Driven Logic: Engineered a job-matching algorithm to shortlist candidates based on skill sets and experience using PHP/Laravel. API Integration: Integrated the Zoom API to automate interview scheduling, facilitating seamless remote communication between recruiters and applicants.
- Full-Stack Development: Designed a comprehensive platform with specialized dashboards for admins, employers, and job seekers using Bootstrap and JavaScript.

- Skill Development Module: Developed an interactive module to track user progress and recommend learning paths, enhancing user employability.

EDUCATION

University of Moratuwa, Sri Lanka

Bachelor of Information Technology (External)

Relevant Module - Object Oriented Programming, Data Structures and Algorithms, Database Management Systems, Web Programming, Mobile Application Development, Software Engineering, IT Quality Assurance, Information Security, Fundamentals of Artificial Intelligence, Web Services, Quality Assurance in Practice, Principles of Management, Computer Networks & Operating Systems

CERTIFICATES

- | | |
|---|----------|
| • Front End Development Libraries
freeCodeCamp | Jul 2024 |
| • Basic Java Developments by using IDE
DigimaxEduLK | Mar 2023 |
